## Summary

Jeff Wilcox is a software developer interested in the intersection between services, web and client applications, and developer frameworks. Jeff is currently a software developer on the Silverlight Toolkit team, and created the AutoCompleteBox control for Silverlight and WPF.

At Microsoft, Jeff has shipped several products, including the Silverlight Toolkit, Silverlight 2, ASP.NET 2.0, ASP.NET AJAX, and IIS7-specific ASP features in Windows Vista and Windows Server 2008.

Jeff designed, coded and released the Silverlight unit test framework used by Microsoft teams across the company and in the industry. He also developed the initial cross-platform test infrastructure used by the ASP.NET team for testing on OS X.

In his spare time, Jeff maintains a technology blog, dedicated web server, and whatever tech projects come along.

Jeff's first company developed web and database solutions for clients all over the United States. He was also a founding partner of [the former] YouTrip.com tour, cruise, and travel service. Jeff also had internships at Pfizer and Consumers Energy.

## Education

### University of Michigan

BS, Computer Science, 2005

## Awards & Honors

Gold Star, Microsoft, 11/07

Eagle Scout
